

Issue with Tokugawa masternode

21117 port should be open. Check if they are open or not on <http://Yougetsignal.com/tools/open-ports/> if it is not open then you can use this software http://download.cnet.com/SPI-Port-Forward/3000-2651_4-10764348.html on VPS to open the ports.

Remote port is 21117

Remote host is your IP

Local port is 21117

max connections are 2

★ SPI Port Forward

File Help

| Local port | Remote host | Remote port | Max. connections | | | |
|------------|--------------|-------------|------------------|------------------------------------|----------|------------|
| 21117 | 155.251.6.81 | 21117 | 2 | <input type="checkbox"/> Autostart | Activate | Deactivate |
| 0 | | 0 | 0 | <input type="checkbox"/> Autostart | Activate | Deactivate |
| 0 | | 0 | 0 | <input type="checkbox"/> Autostart | Activate | Deactivate |

Log

SPI Port Forward initialized.
Forwarder #1 Activated.
